

Transag Service Torque

Spring 2007

The workshop is still humming along with once again all different types of Tractor, Farm Vehicles and Machinery Servicing and Repairs.

BEWARE OF NESTING BIRDS

With spring now here, it is now a timely reminder to all our clients to be on the look out for birds nesting under the bonnets of your tractors. If you have not already checked, please raise the bonnet and check all areas of the Engine Bay. It is also a good time to check those Fire Extinguishers for the last inspection date and for those who don't have one, maybe consider purchasing one and mounting it in a safe place on the tractor. We have good quality 2.3Kg Fire Extinguishers in stock *NZ6289 \$80.00 + Gst*

As the weather warms up and those heaters go off and you find the Air Conditioning is not as efficient as it used to be, call us for a regas or air conditioning repair, we have the equipment and the staff to handle this service.

And from all of us at Transag Centre we wish you all the best for the spring and summer seasons and remember if you have any queries regarding your Tractors, Farm Vehicles and Machinery, call us at Transag Service. 06 3547164.
